CNSC Annual Public Meeting

BWXT Nuclear Energy Canada (BWXT NEC) and other licensees will participate in a virtual public meeting on December 16, 2021 held by Canada’s nuclear regulator, the Canadian Nuclear Safety Commission (CNSC).

Each year, BWXT NEC submits an Annual Compliance Report (ACR) to the CNSC with the purpose of demonstrating that BWXT NEC has successfully met the requirements of the Nuclear Safety and Control Act and its Class IB Nuclear Fuel Facility Operating Licence. BWXT NEC’s 2020 ACR can be found on our website at nec.bwxt.com.

At the meeting, CNSC Staff will present their annual Regulatory Oversight Report. The Report is available on the CNSC’s website at the following link: nuclearsafety.gc.ca/eng/the-commission/meetings/cmd/pdf/CMD21/CMD21-M33.pdf.

For more information on this meeting, visit the CNSC’s website at nuclearsafety.gc.ca.

Supporting our Community

At BWXT NEC, we believe that healthy communities are strong communities.

Part of our BWXT Volunteer Strong program involves providing employees time to volunteer for events during their work day. The BWXT Volunteer Strong program additionally includes contributing funding to local organizations that provide essential services to the community where our employees live and work.

Recently, BWXT NEC was able to provide funding to the Oasis Dufferin Community Centre and the Davenport-Perth Neighbourhood and Community Health Centre.

To learn more about these organizations, visit their websites at the following links:

- oasisdufferin.org/
- dpnchc.com/

Community Webinar

This year, we cancelled our annual summer community BBQ because of the pandemic. This was a difficult decision for the BWXT NEC team as we look forward to this important community event each year. The annual community BBQ gives our team the opportunity to meet with our neighbours to answer questions and address concerns.

In lieu of the BBQ, we held a Community Webinar on October 5th. We had over 25 community members join our webinar and received many excellent questions that were answered by our subject-matter experts. A recording of the webinar has been added to our website at nec.bwxt.com.

Join our Toronto Community Liaison Committee!

Local citizens and representatives of community organizations are invited to apply to BWXT NEC's Toronto Community Liaison Committee (CLC).

The CLC is a forum for the exchange of information between BWXT NEC and members of the community near our facility at 1025 Lansdowne Avenue, Toronto. BWXT NEC seeks to learn more about community priorities, interests and activities, and improve how the company shares information about work at its Lansdowne Avenue facility, involving the company's health & safety initiatives and community activities. CLC members convey questions, discuss concerns and identify opportunities to improve communications and community relations. During the pandemic, our CLC has continued to meet via virtual meetings.

APPLY NOW! The application is available on our website at nec.bwxt.com and can be returned via mail or email. The deadline to apply for the CLC is **December 13, 2021** and new members will be notified in early 2021.

October Emergency Drill

On October 27, BWXT NEC held an emergency response drill at its Toronto facility. Like many businesses, we regularly conduct drills to ensure our employees know what to do in the event of an emergency.

Toronto Fire Services was on-site to participate in the drill. We provide emergency services with training about our facilities and involve them in drills to ensure that any response to an emergency will be coordinated.

There are no requirements for the public as they relate to our drills, because there are no credible accident scenarios that require public evacuation or sheltering in place. We practice drills regularly to ensure that our internal team, employees and local first responders are aware of their role in an emergency.

About BWXT NEC in Toronto

In Toronto, we manufacture ceramic pellets from natural uranium dioxide powder. After pressing, baking, grinding and inspecting the pellets, we send them to our Peterborough facility where they are placed in CANDU® fuel bundles. The fuel bundles are then sent to Ontario Power Generation's Darlington and Pickering Nuclear Generating Stations. Both our Peterborough and Toronto facilities are licenced by Canada's nuclear regulator, the Canadian Nuclear Safety Commission (CNSC).

Approximately 50 people work for BWXT in Toronto in high-value manufacturing positions, engineering, and operations support. This team produces the fuel to power 1 in 4 homes and businesses in Ontario with greenhouse gas emissions-free, affordable electricity!
